SNO KONE MACHINE

SNO KONE MACHINE

The sno kone machine is simple to operate and a great attraction for any event!

INCLUDES: Machine with drain hose, Spoon

INSTRUCTIONS:

1. Place machine on flat level surface and plug into standard outlet.
2. If using inside you will need a bucket (not included) for the hose to drain into as ice melts.
3. Start the motor and fill the gooseneck an inch from the top with ice cubes or 3"x4" pieces of ice. (The larger the ice pieces, the better the snow.)
4. Push ice down against the cutterhead with firm pressure for best snow (too much= coarse ice; too little=mushy)
5. **DO NOT** force the handle.
6. Put only ice in the gooseneck to prevent damage to the blades.
7. **Never put your fingers or any object into the shaver body (the gooseneck) while the motor is running. Serious injury may occur.**
8. Scoop ice into sno-cone cup, pump desired amount of syrup on to ice and enjoy.

Additional Features:

shaves about 500lbs of ice per hour
